

THOUGHT ROCKS ITIL® 4 FOUNDATION E-LEARNING COURSE SUMMARY

Introduction

The purpose of this document is to outline the course seat time/run time and success criteria for Thought Rocks eLearning ITIL 4 Foundation course.

What is eLearning “Run Time” and “Seat Time”?

Run Time – The time of non-stop running of each Topic and the entire eLearning product. There are no pauses, no clicks, no interactivity, and no consideration of screens that contain non-spoken text

- **Note:** Not all ITIL Foundation online text has a voice over equivalent. The continual speaking of this voice over is the basis for “Run Time”.

Seat Time – The time taken by an online participant to complete the “Run Time” material as well as the time to read and comprehend screens of information, time to click on additional material and time to complete interactive questions and activities.

- **Note:** Seat Times are shown in the ITIL online menu for the entire Topic. Run Times indicated in this document are the values that will be displayed.
- **Note:** Practice questions do not use a ratio for Seat Time due to time taken to analyze, choose the best answer, and review the rationale for the correct answers.

Completion Time – The time taken to complete both the online eLearning as well as practice questions and review of hard copy support material.

- Our student feedback has been in the range of 10-12 hours to run through the eLearning and additional hard copy materials.

ITIL 4 Foundation Time Summary

Seat time = 9 hours (minimum)

This time calculation includes 2 hours of practice exams (excluding review).
